Contents

Introduction

The following are functional requirements provided by the system:

- Register
- Login
- Apply for a child's placement
- Track application status
- Approve/Reject an application
- Send application status
- Resubmission of rejected application

About

The **Child Enrolment System** helps parents apply for their children's placement at any local nursery school. It also allows for the nursery principals to approve or reject an application, after which a parent gets a notification on the application's status and further details.

Registration Use Case : This is a registration use case

Input: Parent enters their firstname,lastname,email,username, role and password
Output: A successful registration message and button to redirect to 'login' page

---

Login Use Case : This is a login use case

Input: Parent enters their username, password **Output**: A successful login message and redirection to 'home/landing' page
